EDUCATION

Imperial College London (ICL)

MSc Risk Management and Financial Engineering

London, United Kingdom

Aug 2026 – Aug 2027

- Selected Coursework: Stochastic Calculus, PE & VC, Financial Statistics, Market Microstructures, and Portfolio Management

Nanyang Technological University (NTU)

BEng (Hons) in Electrical and Electronic Engineering with a Specialization in Computing & Intelligent Systems

Singapore

Aug 2022 – Jun 2026

- CGPA: **4.85/5.00** (First Class Honours / Highest Distinction)
- ASEAN Undergraduate Scholarship
- Dean's List AY2022/2023, AY2024/2025, AY2025/2026 (top 5% of cohort in academic performance)
- Relevant Modules: (1) Business Finance (2) Data Structures & Algorithms (3) Artificial Intelligence & Data Mining

Sun Yat-sen University (SYSU)

Winter Exchange Program (Economics)

Guangzhou, China

Dec 2024

PROFESSIONAL EXPERIENCE

Aldiracita Securities

Investment Banking Summer Analyst

Jakarta, Indonesia

Jun 2026 – Aug 2026

- Supported 8+ live capital-markets transactions across corporate bonds, sukuk, and rights issues, contributing to prospectuses, additional information documents, internal memoranda, and underwriting tender submissions
- Conducted financial statement analysis, ratio calculations, capital structure reviews, and transaction benchmarking to support credit assessment, deal structuring, and preparation of investor materials
- Reviewed and reconciled offering terms, historical financial information, shareholder data, and transaction disclosures across deal documents, ensuring accuracy and consistency throughout the execution process

Maybank Securities

Middle Market Intern

Jakarta, Indonesia

Dec 2025

- Prepared repurchase agreement (repo) credit analysis reports, assessing counterparty creditworthiness through Altman Z-Score, DuPont analysis, and financial ratio diagnostics
- Conducted in-depth financial statement analysis, including profitability, leverage, liquidity, and cash flow assessment, to support collateral and counterparty risk evaluation
- Supported data analysis and reporting for middle-market transactions, contributing to internal risk assessments and deal evaluation processes

Singtel

Energy & Sustainability Intern

Singapore

Jun 2024 – Dec 2024

- Performed cost-benefit analyses for energy-saving initiatives at the new Singtel Tuas Data Center, collaborating with cross-functional teams (engineering, procurement, finance) to evaluate return on investment and budget feasibility
- Examined environmental data (temperature, humidity) to optimize climate control strategies, identifying potential operating-cost reductions through improved resource allocation
- Provided regular reporting on sustainability metrics and financial performance to senior management, informing decisions on capital expenditures and potential efficiency upgrades

ACADEMIC PROJECTS

Machine Learning Based Forecasting of Stock Price Movements for Quant Trading

Aug 2025 – May 2026

- Built an end-to-end quantitative research pipeline integrating 72 features across 4 modalities (technical indicators, macroeconomic series, FinBERT news sentiment, calendar effects) for next-day equity movement prediction across 5 large-cap tickers.
- Benchmarked 4 architectures (XGBoost, LSTM, Temporal Fusion Transformer, PatchTST) over 20 model-ticker pairs, tuning XGBoost with Optuna TPE across 100 trials; gradient boosting led on directional accuracy at 55.5%, beating transformers with 60x more parameters.
- Designed a vectorised backtesting engine with realistic friction (5 bps/side, 0.55 confidence gating, regression-driven sizing, -3%/+5% stops); best strategy returned 17.2% annualised (Sharpe 1.02) net of costs, 6 of 20 strategies significant at $\alpha=0.05$.

Optiver - Ready Trader Go

Mar 2023 – May 2023

- Constructed a Python-based auto-trading algorithm using the Avellaneda & Stoikov market making strategy to dynamically quote bid-ask prices and manage inventory risks
- Analyzed spread arbitrage opportunities and applied advanced quantitative techniques – such as liquidity provisioning and high frequency trade execution – to achieve consistent positive returns in a simulated Exchange Traded Fund (ETF) market

LEADERSHIP & ACTIVITIES

NTU School of Electrical and Electronic Engineering (EEE) Club

Student Development Committee

Aug 2024 – Aug 2025

- Organized industry visits and talks with Huawei, STMicroelectronics, and Infineon, connecting students with corporate representatives

NTU Indonesian Students' Association (PINTU)

Public Relations Director

Aug 2023 – Aug 2024

- Led a 10-member committee and executed promotional campaigns that increased attendance at major association events by 57%

SKILLS & INTERESTS

Languages: English (Full Professional Proficiency), Bahasa Indonesia (Native Proficiency), Mandarin (Limited Working Proficiency)

Technical: Python, C++, SQL, Bloomberg Terminal

Interests: Equity & Options Investing, Poker, Badminton, Travelling

Additional Coursework: Portfolio Optimization using Markowitz Model (Coursera), DCF Modeling (Coursera), DeFi Infrastructure (Duke)
